Summary report

29/04/2024 - 14/05/2024

Total: **17:03:00**   Billable: **17:03:00**   Amount: **0,00 USD**

Project
● Replika	17:03:00	100,00%

Description

● Sync with Kris, talk about evaluation, check out tables we can work with, different ways we can organize the data to be able to evaluate properly	01:02:00	6,06%
● Sync with Kris more on the plans. Write initial plan on markdown file and diagram on how we can approach initial evaluation phase. Think also about what technologies we can leverage to achieve our objective	02:00:00	11,73%

●	Organize code to run instructor evaluation pipeline, create queries to get all user context by user_id, parse it into a format we defined and save to clickhouse + Call with Kris to talk about ideas, diagram of overseer, discuss ideas in notion and more	04:00:00	23,46%
●	Initial clickhouse queries, exploration, pydantic model to work better with clickhouse results, check out results, understand how the data is being stored and how to make use of it	01:00:00	5,87%
●	Call with Kris on what the company expects as results, deadlines we have, more structured plan for the next couple weeks, talk about the models for evaluation created, how we need to trim down on the models and focus on a few metrics to start and iterate on more later	01:45:00	10,26%
●	Query clickhouse for only messages with meaningful >10 context, check how many rows for the churned users have meaningful context, debug instructor and more.	02:00:00	11,73%
●	Queries, experimenting with instructor, experimenting with different models, descriptions, different AI's and gathered results. As well as research on ideas and alignment call	03:00:00	17,60%
●	Initial discussion on our objective with Replika chats, what will be done in the next weeks/month	01:12:00	7,04%
●	About clickhouse, initial talk on evaluation	00:34:00	3,32%
●	Started looking into the data, ways we can do it, created stuff to load the csv with churned users, get the ids and query	00:30:00	2,93%

Project / Description	Duration	Amount
Replika	**17:03:00**	0,00 USD
Sync with Kris, talk about evaluation, check out tables we can work with, different ways we can organize the data to be able to evaluate properly	01:02:00	0.00 USD
Sync with Kris more on the plans. Write initial plan on markdown file and diagram on how we can approach initial evaluation phase. Think also about what technologies we can leverage to achieve our objective	02:00:00	0.00 USD
Organize code to run instructor evaluation pipeline, create queries to get all user context by user_id, parse it into a format we defined and save to clickhouse + Call with Kris to talk about ideas, diagram of overseer, discuss ideas in notion and more	04:00:00	0.00 USD

Initial clickhouse queries, exploration, pydantic model to work better with clickhouse results, check out results, understand how the data is being stored and how to make use of it	01:00:00	0.00 USD
Call with Kris on what the company expects as results, deadlines we have, more structured plan for the next couple weeks, talk about the models for evaluation created, how we need to trim down on the models and focus on a few metrics to start and iterate on more later	01:45:00	0.00 USD
Query clickhouse for only messages with meaningful >10 context, check how many rows for the churned users have meaningful context, debug instructor and more.	02:00:00	0.00 USD
Queries, experimenting with instructor, experimenting with different models, descriptions, different AI's and gathered results. As well as research on ideas and alignment call	03:00:00	0.00 USD
Initial discussion on our objective with Replika chats, what will be done in the next weeks/month	01:12:00	0.00 USD
About clickhouse, initial talk on evaluation	00:34:00	0.00 USD
Started looking into the data, ways we can do it, created stuff to load the csv with churned users, get the ids and query	00:30:00	0.00 USD
